The Life Of Louise Hay

1) Louise Hay was born, in Los Angeles, California, United States on the 8th October 1926
Before she got up to all her positive book writing tricks
Going to college and University for a while
Whilst giving to lots of other people a very big smile

2) Hay became an all-round American motivational author and professional speaker
Sharing, in writing, plenty an interesting feature
Producing positive statement book after book
To successfully help lots of different people get off the hook

3) Hay briefly married Andrew Hay from 1954 to 1968
Who then sadly separated after a bitter debate
But she was to cover a very long distance
In helping out others come of great big assistance

4) Hay was to help lots of different people out
Publishing many New Thought self-help books with no single doubt
Including the one ‘You Can Heal Your Life’ in 1984
Which was to prove more popular than ever before

5) Hay passed away from natural causes on the 30th August 2017
With her, aged 90, in San Diego, California, United States last to be seen
Though with some thoughtful messages and bit of dismay
She would have been turning 100 today
