

Beware It's Halloween!

- 1) In October it's now reached Halloween
When there'll be lots of people dressed as witches to be seen
Them and wizards will be walking down each street
Intent of facing no defeat
- 2) If no-one treats them pretty well
These witches and wizards will cast on you a spell
Whether or not they're walking in the fog
If you're cheeky to them they may turn you into a frog
- 3) Lots of children enjoy Halloween yes
Some of them going round with a broomstick or so I guess
Plenty of them also carrying a magic wand
A sight of which many people aren't too fond
- 4) To prevent a spell or two being cast with no hesitation
People of the different neighbourhoods give these children a small donation
Then they can close their front door
Feeling safe and sound once more
