

Car Driving

- 1) Going for driving tuition
Is a popular mission
Learning how to use a car
Driving near and far

- 2) You first of all start the ignition
With the instructor's permission
Then try the acceleration
With no hesitation

- 3) You take off the brake
Without a mistake
And drive down many a street
Being kept busy with your feet

- 4) To let others know you are a beginner or so
You should have an L plate on show
And really concentrate
Or you could face a fate

- 5) When your Test you have passed
Don't drive your car too fast
Or you'll bump into another vehicle or two
Which could mean injury for quite a few

- 6) Driving your car costs a lot as everyone does see
With the insurance, petrol, Tax and M.O.T.
To drive you really have to save
And on the road be sensible and brave
