

It's A Rainbow!

- 1) Through the combination of rain and sunshine up-high
There's a lovely rainbow in the sky
Which at the sight of, everyone says 'hay presto'
At all the lovely colours in the air it does show

- 2) Those who first spot it politely to others point it out
And that gets done without a doubt
It's definitely a very rare sight to be seen up high
But a very nice one no lie

- 3) A very pleasant enjoyable sight
Made up through drops of rain with in the background some bright light
Yes its weather that makes people feel quite jolly
At the same time as have up their brolly

- 4) It only takes a short while though
Before the rainbow does go
Then with the clouds giving their dull power
We have a very heavy shower
