

Life At The North Pole

1. At the North Pole it gets very very cold
Or so me and many others are told
Though the scenery is quite nice
With lots of snow, frost and ice
2. As a quite interesting feature
Here you also see plenty a different creature
Lots of seals and polar bears no doubt
To be seen making their own way about
3. Some people at living here also have a go
And become known as many an Eskimo
Who in a building really different to ones owned by me and you
Live in one that's called an igloo
4. To avoid getting exceedingly cold
The Eskimos to wear very thickly woollen clothes are told
Because it would come to no-one's delight
If any of them were to suffer a deeply frost bite
5. Whilst in their igloos resting their cold feet
The people here are often having something quite hot to eat
And one thing they extremely require
Is to try and keep warm by a fire
