

Smile And The World Smiles With You

- 1) Everyone should have a warm heart
And in having love for one another play a part
Be very pleasant and polite
Through each day and night
- 2) We need to all give each other a grin
And a very happy life begin
The more love and joy you give
The higher with it you do live
- 3) Happiness is also a key to good health
Which is worth much more than wealth
Joy is something wanted by very many
That doesn't cost a penny
- 4) Entirely everyone in life does achieve a great lot
Though think positively of it they do not
But if you think 'I AM VERY HAPPY' as your endeavour
Alone, and with others, you'll smile forever
