

Stones

- 1) Many a stone you can see
On the beach by the sea
Mixed amongst the sand
Where the sight is quite grand
- 2) Some stones are into the water thrown
By some people on their own
Who have them jump on the water
Just like they ought ta
- 3) Gem stones are fixed to many a chain
And people wear them time and again
Have them round their neck certainly
Where they give some energy
- 4) There was once Stone Age man in Britain
Or so it has been written
Where the main thing used was many a stone
And that on its own
- 5) Stones will be seen for many years to come
Of them a very large sum
Some for energy held in many peoples hand
And others left amongst the sand
