

The Emergency Hospital Staff

- 1) The ambulance people have a real lot to do
Sometimes need to get quickly to me or you
With the siren on they go speeding down the street
Intent of facing no life saving defeat
- 2) Having arrived where the accident's taken place
They have a health saving challenge to face
Need to for the victims lots of care show
Before with them to the hospital go
- 3) At the hospital the badly injured are quickly helped out
And that's done nicely without a doubt
Following the accident scare
The ambulance has quickly taken them there
- 4) The Doctors and Nurses in the A & E Ward
Are really to be deeply applaud
Because they help lots of people get better
Instead of being a very big health problem regretter
- 5) To all the hospital staff we need to say thank-you
For saving the lives of oh quite a few
And hope that they continue to do just as well
In what the future incidents have to tell
