

The Firemen

- 1) Firemen have a real lot to do
To keep things safe for me and you
They put out plenty a fire
As we require
- 2) They handle carefully a blaze
As, with danger, at them they gaze
From fires they help everyone they can, escape
And do this without any mistake
- 3) They take very often a risk
And have to work quite brisk
Firemen endanger their own life
To help many a husband and wife
- 4) Firemen help who they can out of trouble
Are always on the spot at the double
With a siren they drive briskly down the street
Intent of facing no defeat
- 5) To all of them we owe thank-you
For what they did do
From where we could have been dead
They've had us to safety instead
- 6) Firemen use a ladder and hose
And special protected clothes
Large incidents they handle quite brave
To avoid people going to their grave
