

## The Royal Air Force (RAF)

1. The RAF can be seen flying many an aeroplane  
Extremely time and time again  
And I'm not telling a lie  
When I say they go all over the sky
2. The spitfire came to the rescue in the war  
Winning a battle in the air never seen before  
It really was a well flown ideal plane  
That had Hitler and all of Germany giving up in sane
3. There's a lot of pilots in the RAF  
Some who sadly in wars have suffered death  
But mostly ones who've gone on to succeed  
Whatever their high flying challenging deed
4. The RAF need to speed their planes down the runway  
To take off with no at all delay  
And then they have a very good view  
Whilst flying highly above me and you
5. Over the years there's been plenty an air show  
With supreme pilots at real high-up stunts having a go  
Often in the sky on show all of the red arrows  
At the same time as scaring off some of the nice sparrows
