

## Valuable Donations

- 1) A number of dead people in helping others has been a big issue  
By them donating an organ, heart or tissue  
The specialist nurses deeply appreciate this taking place yes  
Saving plenty of other people's lives or so I guess
- 2) Donations in peoples 'will' is always being given a deep request  
And thoughtfulness of people needing transplants being put to a test  
To other's health we can all come of assistance  
Together help them cover oh quite a distance
- 3) Lots of people with illnesses are worried they'll no-longer survive  
Until a last minute donation has kept them alive  
Then they deeply acknowledge someone has very generously helped them out  
And done that without a single doubt
- 4) The NHS staff at Royal Preston Hospital and other places with deep co-operation  
Have carried out many an important lifesaving operation  
Though this can really only take part  
With lots of other people deeply sharing their heart
