

50th Anniversary Of Moon Landing

- 1) With everything going quite fine
The US Apollo 11 had a blast-off on the 16th July 1969
And to be deeply applaud
Neil Armstrong, Buzz Aldrin and Michael Collins boldly were based on board
- 2) With millions of people on the planet earth drinking to it with wine
The Apollo lunar landed on the Moon on the 20th July 1969
Which with no hesitation
Was to make way for lots of future space exploration
- 3) Armstrong said 'Houston, Tranquillity Base here, The Eagle has landed'
Then to have the pleasure of first step on the Moon he was handed
Followed by both his colleagues yes
Who as astronauts were very proud to do so or so I guess
- 4) These three astronauts just after landing on the Moon
Hosting a US flag on it were on Worldwide TV to be seen soon
Followed by lots and lots of celebration
With people showing this achievement plenty of appreciation
- 5) In July 2019 Cities globally have held events to celebrate the 50th anniversary of this
And put together many activities not to miss
With still living Buzz Aldrin and Michael Collins appearing on TV
To along with unfortunately dead Neil Armstrong be very proud of by you and me
