

Neil Diamond Is 85

- 1) Neil Diamond was born in New York City, U.S. on the 24th January 1941
And he was to develop a great career before much time had gone
Earlier this year reaching the age of 85
Still having his singer, songwriter, and musician life completely alive
- 2) Diamond wrote and recorded ten singles reaching No. 1
With in his life a real lot going on
Later getting thirty-eight in the top 10
Including 'Sweet Caroline' which was to be sung time and again
- 3) Diamond was to have plenty a different wife
Each having a special effect on his life
4 children in his family as-well
To whom he had quite a lot to tell
- 4) Diamond became a Rock & Roll Hall of Fame yes
Singing lots of popular pop music or so I guess
With "Cracklin' Rosie", "I'm A Believer" and certainly "Sweet Caroline" having an impact
To be played extremely often as a matter of fact
- 5) Diamond with lots of performances is still out to please
Though he retired from touring in 2018 due to a Parkinson's disease
But hopefully continuing to sing for a while
Bringing to all the different listeners a very big smile
