

## Prince Charles is 70

- 1) Prince Charles has now reached the special stage  
Of becoming 70 years of age  
Next in line to the UK throne for a while  
He's been bringing to lots of people a very nice smile
  
- 2) Prince Charles and Princess Camilla have been getting on well  
In what their years together has deeply had to tell  
Earlier this year in the morning dawn  
Grandchild Prince Louis was to some of their Royal Family children born
  
- 3) Prince Harry married Meghan earlier this year  
Which brought to the Royal Family a very big cheer  
Prince Charles and Princess Camilla also may be over the moon  
Knowing that they'll have another grandchild soon
  
- 4) Prince Charles with Prince Trust awards came out  
Which lots of young people have shown interest in no doubt  
And he loves time at the Highgrove home  
Where he does farming with other Royal Family members or just on his own
  
- 5) Prince Charles in a year or two maybe will become King  
And a totally new National Anthem we'll all together sing  
With us all remembering his mother Queen Elizabeth's long reign forever  
And let it slip our minds again never
