

Sir Paul McCartney Is 70

- 1) Sir Paul McCartney's this year at a special stage
Of now becoming 70 years of age
He's been composing, producing, and singing songs for ages
Making all the music magazine front pages

- 2) In the 1960s with the Beatles he got going not before too long
With him, John Lennon, George Harrison and Ringo Starr
Producing many a lovely and popular song
Not until April 1970 did this group come to an end
The fans thinking this was mostly with Paul and John
Each finding a wife to be friend

- 3) Paul formed the group 'Wings' in about 1971
Who published plenty a good song before much time was gone
Then with his first wife Linda and their 4 children family being delighted
In the year 1996 for all his great achievements he was by the Queen 'Knighthed'

- 4) But Paul became very upset with no debate
When Linda died of cancer in the year 1998
He then had Heather Mills followed by Nancy Shevell as a wife
Who each with him were to have a very enjoyable time of their life

- 5) Paul's been helping lots and lots of people rejoice
Regularly like in 'The Diamond Jubilee Concert 2012' using his great singing voice
Along with a James Bond song he's over the years had many a number One
And will probably release plenty more before much time has gone
